Information about various professions & courses available to students after 10 and 10+2

What to do after 10th?

Many times it has been asked by the students that what chose after 10th class. This is good question and need to give a deep consideration over it. This is the state where students have to choose their line, their stream or we can say this state change their future.

The first thing I would like to say children, check yourself what can do? Check your strength and performance? If you have confidence for some kind of typical courses then only go for that.

Some points to consider after 10th:-

1. What is your aim?
2. What do you want to be in your life?
3. Which subject you like most?
4. Which subject you feel difficult?
5. What are the family conditions of your parents, financially?
6. Job opportunities in that course?

So these are some points which one should consider that before choosing a subject. Frist decide what you want to do? And then decide the subject accordingly, whether you want to be a doctor, want to go in medical line, accounts, engineering, teaching and many more. So first check your interest then check your financial status, ask your parents for that whether they are able to afford that or not? Which is the subject you thing most favourable and you always score good marks in that. What are the job opportunities in that course? These are some points which one should take into consideration before choosing a subject.

Career in Arts / Humanities Stream-Job Opportunities After Arts

Arts and Humanities: This subject is always known of low grade stream but if we look closely on some great points like IAS and IPS officers our thinking can change. Most of the officers come out form Arts stream. By choosing this stream you can have several career options like travel and tourism, journalism, business management and advertising.

Humanities are the best and first choice of all students who wish to give civil service exams. But this stream doesn't offer as wide range of career options that other streams offer like commerce and science stream. Students can take admission in these courses easily as these don't demands high marks in 10+2 level.

It has been also seen that the students who chose arts for their career after 10th class. Don't think about it, there are many lake of proper guidance, there may be fewer marks which not enable students to choose his subject and there may be some financial problem. The student from arts or humanities degree from the university. So most of them look forward for government jobs, by giving competitive exam. Some get temporary jobs on the basis of basic computer education plush a graduate degree. Very few of them go for higher studies, those who have some plans in their mind. So it is always advisable to think, make your mind set, for a stream after 10th class. It is the first stage of your career.

Career Option in commerce Stream Jobs after Commerce Stream

Most of the student always looks towards commerce Stream. Some Student, who gets little good marks, moves towards this stream without talking any decisions. Some students choose this stream with proper guidance and with proper knowledge. Now let's look what this stream can offer you, what are the career possibilities in this stream and why to choose commerce after 10th?

Commerce stream have wide range of career option for the students. Students can choose the following in commerce stream.....

- Chartered Accountancy
- Company Secretary
- ICVVA
- Business Management
- Cost Accountancy
- And Computer

Graduation degree is must means you have to be B.Com graduate for applying. If you have done course form well known institute, it can offer you advantages. Therefore everyone should have the good knowledge of computer course.

IF you are willing to do MCA from INGOU, you can also go for that after B.Com. You just have to pass CIC course, which is 6 moth courses. It will make you eligible doing MCA from IGNOU. After B.com you can also do MBA in Finance. MBA in finance will make you eligible for various types of good and high post jobs in various companies. You can apply in Banks. So it is good and many kinds of jobs are waiting in this stream. But whatever stream you choose, just concentrate on your study and try to get high marks with sound knowledge of that subject.

Always choose your subjects and stream after proper guidance, after knowing your interest, jobs opportunities in that course stream, and other points like financial conditions, job requirement just after the education etc.

Career in Science in Science Stream Jobs and other career options in Science stream

The subject of Science of Subject is always considered superior than other subjects like Arts and Commerce. All the teacher, students and parents also reply on this fact. Students those who opts science also considered better than other students of Commerce and Arts and this is also the general feeling of the society.

If students want to make his or her career in engineering courses like electronics engineering, mechanical engineering, civil engineering, metallurgy and computer engineering courses, then a combination of Physics, mathematics and chemistry is needed. If you choose science stream at 10+2 level, then the career options for many other courses will be open for you in the field of medicine, engineering or agriculture.

Students can choose degree courses in some specific professional areas rather than go for conventional combination degree level courses. These degree level courses include physiotherapy, tourism management, nursing computer, hotel management, occupational therapy, business administration.

Students can also choose other courses like fashion technology, packaging aircraft, industrial design, engineering for aircraft maintenance, and other professional computer courses available for 10+2. So the decision of science stream or any other professional courses should be taken only after proper consideration and after having proper knowledge of fee structure whether you or your parent would be able to furnish the required fee and other expensive for that course. As time very precious and these two years after 10th class decide your future
